

## Dynavax Announces Fourth Quarter and Year End 2006 Financial Results

BERKELEY, Calif., Feb. 13 /PRNewswire-FirstCall/ -- Dynavax Technologies Corporation (Nasdaq: DVAX) today reported financial results for the fourth quarter and year ended December 31, 2006.

As of December 31, 2006, Dynavax reported cash, cash equivalents, marketable securities and investments held by Symphony Dynamo, Inc. (SDI) totaling \$86.2 million. This compares to \$75.1 million at December 31, 2005.

"As we enter 2007, Dynavax has a strong cash position that together with our funds from existing partnerships and grants will allow us to advance our late-stage clinical product candidates as well as several important preclinical programs, including our universal influenza vaccine. Our fourth quarter cash represents a significantly strengthened position, primarily attributable to the approximately \$44 million in net proceeds received from public offerings in the fourth quarter of 2006 that brought in a number of new well-known investors. In addition, we received a \$10 million upfront payment in September 2006 from AstraZeneca, as part of the worldwide research and development collaboration in asthma and COPD. We also expect to add another \$30 million in April 2007 representing the remaining funding commitment by SDI for Dynavax's programs in cancer, hepatitis B and hepatitis C therapies," said Dino Dina, MD, president and chief executive officer.

Total revenues were \$2.4 million and \$4.8 million, respectively, for the fourth quarter and year ended December 31, 2006, compared to \$0.6 million and \$14.7 million for the same periods in 2005. The reported revenues do not include collaboration funding from SDI of \$4.4 million and \$9.7 million, respectively, for the fourth quarter and year ended December 31, 2006. Revenues for the fourth quarter and full year 2006 include collaboration revenue from AstraZeneca, service and license revenue from customers of Dynavax Europe, and grant revenue primarily from the NIH. Revenues for full year 2005 reflected accelerated recognition of deferred revenue following the end of Dynavax's collaboration with UCB Farchim.

Total operating expenses were \$24.4 million and \$69.8 million, respectively, for the fourth quarter and year ended December 31, 2006 compared to \$10.1 million and \$37.1 million for the same periods in 2005. Operating expenses included non-cash charges for stock-based compensation, as well as acquired in-process research and development and amortization of intangible assets resulting from the April 2006 Rhein acquisition. Excluding non-cash charges, pro forma operating expenses were \$23.3 million and \$61.7 million, respectively, for the fourth quarter and year ended December 31, 2006. The higher operating expenses for 2006 resulted primarily from increased clinical development activities related to the Company's product candidates TOLAMBA<sup>™</sup> and HEPLISAV<sup>™</sup>, the expansion of the Company's operations to include Dynavax Europe, and reimbursable expenses related to SDI programs.

Net loss for the fourth quarter 2006 was \$16.5 million, or \$0.44 per share, compared to a net loss of \$8.8 million, or \$0.30 per share for the same period in 2005. Net loss for the year ended December 31, 2006 was \$52.1 million, or \$1.61 per share, compared to a net loss of \$20.6 million, or \$0.79 per share for the same period in 2005. The increase in net loss for 2006 was due primarily to increased clinical development expenditures on the Company's lead product candidates as well as lower revenues following the termination of the UCB Farchim collaboration in 2005. The tables included as part of this press release provide a reconciliation of GAAP revenues and operating expenses to pro forma revenues and operating expenses.

Guidance for 2007 will be communicated after the company's assessment of the recently reported one-year data analysis from its DARTT ragweed allergy trial is completed.

## About Dynavax

Dynavax Technologies Corporation discovers, develops, and intends to commercialize innovative TLR9 agonist-based products to treat and prevent allergies, infectious diseases, cancer, and chronic inflammatory diseases using versatile, proprietary approaches that alter immune system responses in highly specific ways. Our TLR9 agonists are based on immunostimulatory sequences, or ISS, which are short DNA sequences that enhance the ability of the immune system to fight disease and control chronic inflammation. Our pipeline includes: HEPLISAV<sup>™</sup>, a hepatitis B vaccine in Phase 3; TOLAMBA<sup>™</sup>, a ragweed allergy immunotherapy; a therapy for non-Hodgkin's lymphoma (NHL) in Phase 2; and a therapy for metastatic colorectal cancer in Phase 1. Our preclinical asthma and COPD programs are partnered with AstraZeneca. NIH funds our preclinical work on a vaccine for influenza; Symphony Dynamo, Inc., funds our colorectal cancer trial and our preclinical programs in hepatitis B and C therapies. While the NIH and Symphony provide program support, Dynavax has retained rights to seek strategic partners for future development and commercialization. For more information, please visit http://www.dynavax.com.

This press release contains forward-looking statements that are subject to a number of risks and uncertainties, including

statements about our product candidates and financial position. Actual results may differ materially from those set forth in this press release due to the risks and uncertainties inherent in our business, including difficulties or delays in development; achieving the objectives of our collaborative and licensing agreements such as our SDI and AstraZeneca arrangements; and obtaining regulatory approval for our products; the scope and validity of patent protection for our products; possible claims against us based on the patent rights of others; our ability to obtain additional financing to support our operations; and other risks detailed in the "Risk Factors" section of our Annual Report on Form 10-K and Quarterly Report on Form 10-Q. We undertake no obligation to revise or update information herein to reflect events or circumstances in the future, even if new information becomes available.
